**Teachers use ICT enabled tools for effective teaching -learning process**

Today's world is a world of ICT. ICT is a powerful tool for educational change and reform. Appropriate use of ICT has helped to raise the interest levels amongst the students and has helped connect learning to real-life situations. Students enjoy while learning and perform better.

Besides the chalk and talk method of teaching we use intensive use of ICT enabled tools, including online resources for effective teaching and learning process. The faculty use classrooms with LCD projector, wi-fi connectivity, software, PowerPoint presentations, developed by teachers to expose the students to advanced knowledge and practical learning.

Different ICT tools such as. google meet lectures, audio lectures, online test, etc. What's app group to provide study material. ICT helped students to develop new skills and become more creative. It improves pupils' academic performance as their classrooms experience also improved motivation and attention levels are increased, contributing to greater effectiveness in the learning processes like Movie shows, YouTube lectures, audio lectures, PPTs. Some students join academies to prepare for the police recruitment and other competitive examinations, so they can't attend the lectures regularly. In such cases study material can be provided through What's app groups by listening Audios they can understand the topics without attending the classrooms.

Through online test we can save papers and this is ecofriendly activity which can be attended from any place and can be solved any time. Through Movie shows students can be understand the dramas. novels in an effective way. It is helpful to comprehend the different issues. Through PPTs topics can be taught in a systematic and precise way. YouTube lectures are stored, so any time students can watch those lectures in order to understand the topic.
